We will leave the task of predicting the actual cost of sea water conversion to others, but we assure you that a very considerable effort is being made to continue the research and development necessary to reduce the cost of converting sea water and make it competitive in certain areas of the world. We feel that the rate of development is directly contingent upon continued programs of the Office of Saline Water to push this higher temperature operation so that we can get the most out of the processes that we have been formulating to this time. We also believe in the modular design. Our units reflect that. Some of the other testimony I heard earlier has me believing that our system is very definitely designed so that should we have failure of one component in there, it will not shut our...
