Wipf Stock Publishers, United States, 2012. Paperback. Book Condition: New. 226 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Synopsis: This book explores the little-regarded phenomenon of the tricolon in biblical Hebrew poetry, that is, those poetic lines that appear to have a tripartite form rather than the more common bipartite form. Taking the Psalms of Ascents as a sample corpus of poetic texts, it identifies tricola on an explicit and consistent basis. It draws on the rhythmical-accentual approach of Eduard Sievers, and in so doing highlights an important but neglected aspect of his method. The concept of a para-tricolon is developed, designating a line that is tripartite, yet rhythmically equivalent to a conventional bicolon. Analyses of psalm structures and of the syntactic and semantic structures of each tripartite line facilitate an assessment of the function of, and characterization of, tripartite lines. The significance of enjambment is explored as a distinguishing factor between different line-forms and as a means of uniting non-parallel cola. The study demonstrates clear differences between the form and function of para-tricola and those of tricola, and so will facilitate a more nuanced and realistic appraisal of the functional significance of Hebrew poetic line-forms. Endorsements: While many of the basic elements of Hebrew poetry have long been established, there remain features which have not been adequately analyzed, and intricacies and subtleties which merit further investigation. Stocks s study provides a fine example of a careful structural and colometric analysis, which provides the foundation for his proposals concerning the significance of the tricolon and his proposed para-tricolon. A welcome contribution to the study of Hebrew poetry! --Adrian Curtis, University of Manchester This detailed analysis of the colometric structure of the Psalms of Ascents points to some drawbacks in previous research. To overcome these...
