Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

It combines the efficiency of the wet sheet rub with the convenience of the simplest hydriatic measure, and may be given in any home by a fairly intelligent person. NOTES NOTES The patient lies on the bed with all the clothing removed and covered by a sheet and light woolen blanket. The attendant is provided with several linen and turkish towels, a pail of water at the temperature desired for the application and a basin of water ten or fifteen degrees cooler. After the head is cooled and a compress placed on the forehead and temples, the arm nearest the attendant is raised, a towel that has been dipped in the cool water and wrung out as dry as possible, is quickly wrapped about it in such a manner that the upper end covers the whole hand and is grasped by the patient. The attendant now rubs his hands briskly a few times over the towel in such a manner that the towel does not produce friction on the skin. The arm is then unwrapped and laid at the side upon a turkish towel that has been placed there for its reception. It is rapidly dried, without friction in fever cases, and covered. The attendant proceeds to treat the other arm in like manner, then come the legs, chest, abdomen, back and buttocks, each part at a time. The intensity can be varied by changing the temperature of the water, leaving...
