## Study of New Fluorosulphate Materials for Lithium Ion Battery

By Lei Liang

LAP Lambert Academic Publishing Nov 2015, 2015.

Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware -

In this book, synthesis, structural and electrochemical performances, especially kinetics of  $\text{LiFeSO}_4\text{F}$  are investigated.  $\text{LiFeSO}_4\text{F}$  powder was obtained through ionothermal and solid state methods. The properties of obtained powders were characterized by X-ray diffraction (XRD) and scanning electron microscope (SEM). The diffusion path of  $\text{LiFeSO}_4\text{F}$  was investigated through crystallography point of view. The concept of  $\text{Li}^+$  hopping distance and anion window were used to determine the fastest diffusion path. First principle calculation data on activation energy was applied to derive the theoretical diffusion coefficient in the order of  $10^{-15} \text{ cm}^2/\text{s}$ . The apparent chemical diffusion coefficients ( $D$ ) of lithium in the material were measured by cyclic voltammetry (CV), galvanostatic intermittent titration technique (GITT), electrochemical impedance spectroscopy (EIS) and potential relaxation technique (PRT) methods. Rate and cycling performance were studied with film and/or powder electrode. The effect of particle size to the electrochemical performance was studied. The reason of moisture sensitivity is proposed and tested. 100 pp. Englisch.

### Reviews

*A whole new electronic book with a new point of view. It can be full of knowledge and wisdom Its been written in an exceedingly simple way which is only following i finished reading through this pdf in which really modified me, modify the way in my opinion.*

-- **Arianna Nikolaus**

*This ebook is wonderful. I have got go through and so i am certain that i am going to likely to read through once again again later on. You will like the way the article writer compose this ebook.*
